REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The problem addressed by the instant method and device is to provide an improved vapor compression distillation system and associated components that increases efficiency and production capability, while decreasing the necessary power budget for system operation and the amount of system maintenance required. (See page 2, lines 10-13).

This problem is solved according to the invention by providing a distillation system that advantageously may be compact, inexpensive, and easily maintained, i.e., providing e.g., a distillation method and device comprising in combination: a sump in communication with an input for untreated liquid wherein the sump includes at least one heating element and wherein input liquid is preheated; an evaporative condenser coupled to the sump for transforming the liquid to vapor and for transforming compressed vapor into a distilled liquid product; a head chamber for collecting vapor from the evaporative condenser; a vapor pump for compressing the vapor, the vapor pump in communication with the evaporative condenser head chamber and comprising: a single continuous internal drive shaft, and at least one intake for axial feeding, an eccentric rotor with a fully rotatable housing, and wherein the evaporative condenser comprising a plurality of parallel core evaporator tubes, each tube having a first open end in communication with the sump and a second open end in communication with the head chamber. [See e.g., claim 1].

The combination of GB 1211236, Huse (3,956,072), Stewart (1,668,532), Heinio et al (5,340,443), Morris (5,772,850) and Satchwell (3,635,283) [closest prior art] fail to disclose, teach or suggest all of the limitations found in claim 1, interalia, the evaporative condenser comprising a plurality of parallel core evaporator tubes, each tube having a first open end in communication with a sump and a second open end in communication with a head chamber and a sump in communication with the input wherein the sump comprising at least one heating element and wherein input liquid is preheated.

Thus, the subject matter of claims 1-3, 8, 12-13, 15, 18-20, 24-32, 36, 49 and 53 is neither disclosed by the prior art nor is obvious.

The claims are deemed allowable over the prior art of record.

Any comments considered necessary by applicants must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee. Authorization for this examiner's amendment was given in a telephone interview with Atty. Michelle Saquet Temple, representative to applicants, on June 3, 2009.

IN THE CLAIMS:

Claim 36, line 1, between "distilling" and "a", --in a distillation system -- has been inserted.

Claims 1-3, 8, 12-13, 15, 18-20, 24-32, 36, 49 and 53 are allowed.

Any inquiry concerning this communication should be directed to Virginia Manoharan at telephone number 571-272-1450.
